F-145

- IEEE 1394a camera
- Modular design
- Robust housing
- Machine vision camera

Description

Compact, flexible, modular IEEE 1394a 1.4 Megapixel C-Mount camera

The Marlin F-145B/F-145C is equipped with a highly sensitive Sony ICX205 CCD sensor. It runs at 10 frames per second at full resolution and Format_7. Higher frame rates can be reached by using a smaller area of interest (AOI) and binning.

Features

Marlin cameras are equipped with many useful real-time image pre-processing functions. They are performed by the FPGA inside the camera – with no additional CPU load on the host, so that an inexpensive system is sufficient.

- Programmable look-up table (LUT), white balance, hue, saturation
- Debayering
- Gain
 - Auto/manual
 - Manual gain control: 0 to 24 dB
- Exposure
 - Auto/manual
 - Exposure time: 38 μs to 67 s
- Color correction

- Shading correction
- Sub-sampling, 2x binning (b/w)
- Area of interest (AOI) with speed increase
- Sequence mode - changes the image settings on the fly
- Image mirror
- Deferred image transport
- SIS (secure image signature, time stamp for trigger, frame count)
- Storable user settings
