Description

Fast CCD camera with Gigabit Ethernet interface, 205 frames per second

Prosilica GE680 is a very fast, VGA resolution (0.3 Megapixel), high-performance machine vision camera with a Gigabit Ethernet interface (GigE Vision®). The ON Semiconductor CCD sensor is suitable for applications where speed and good sensitivity are required. At full resolution, this camera has a frame rate of 205 frames per second. With a smaller region of interest higher frame rates are possible. By default monochrome models ship with no optical filter and color models ship with an IRC30 IR cut filter.
