Description

8.1 Megapixel CCD GigE Vision camera for extreme environments

Prosilica GT3300/GT3300C is a 8.1 Megapixel camera with a GigE Vision compliant Gigabit Ethernet interface. This camera incorporates the high-quality ON Semiconductor KAI-08050 TRUESENSE CCD sensor providing excellent monochrome and color image quality. It is a rugged camera designed to operate in extreme environments and fluctuating lighting conditions. This camera offers Precise iris lens control allowing users to fix the aperture size to optimize depth of field, exposure and gain without the need for additional control elements. By default monochrome models ship with no optical filter and color models ship with an IRC30 IR cut filter.

Options:

- Various IR cut/pass filters and lens mounts
- Various sensor options

See the Modular Concept for lens mount, optical filters, and sensor options.
