Prosilica GT4096NIR is a 16.7 megapixel camera with a GigE Vision compliant Gigabit Ethernet port and Hirose I/O port. Prosilica GT4096NIR is an extended near-infrared model. This camera incorporates the high quality ON Semi PYTHON 16K NIR (NOIP1FN016KA) CMOS sensor with In-pixel Correlated Double Sampling global shutter technology. At full resolution, this camera runs 7.18 frames per second. With a smaller region of interest, higher frame rates are possible. Prosilica GT4096NIR is a rugged camera with a robust thermal housing that is designed to operate in extended temperature ranges and fluctuating lighting conditions. It is a large format housing camera with a standard F-Mount lens mount. By default NIR models ship with no optical filter.

Benefits and features

- Extended near-infrared (GT4096NIR) model
- GigE Vision interface with Power over Ethernet
- Screw mount RJ45 Ethernet connector for secure operation in industrial environments
- Supports cable lengths up to 100 meters (CAT-6 recommended)
- Trigger over Ethernet Action Commands allow for a single cable solution to reduce system costs
- Comprehensive I/O functionality for simplified system integration
- Planarity adjustable (PA) EF Lens Mount (option -18) for electronic control of aperture and autofocus
- Easy camera mounting via standard M3 threads at all sides and 1/4-20 tripod mounting hole
- Easy software integration with Allied Vision's Vimba Suite and compatibility to the most popular third party image-processing libraries.
- Enhanced Defect Pixel Correction feature with a new Defective Pixel List Manager tool that allows you to load different user defined defective pixel lists to match your application and optimize the life cycle of the camera.
Hardware options

- Various lens mounts: Select between F-Mount PA, M58-Mount, M58-Mount PA, EF-Mount PA, M42-Mount, M42-Mount PA
- Various optical filters: Select between B 270 ASG protection glass and filter types: IRC30 IR cut filter, Schneider 486 IR cut filter

See the Modular Concept for lens mount and optical filters options. See the Customization and OEM Solutions webpage for additional options.

Imaging performance

Imaging performance data is based on the evaluation methods in the EMVA 1288 Release 3.1 standard for characterization of image sensors and cameras. Measurements are typical values for NIR models measured without optical filter.

- Quantum efficiency at 529 nm: 55 %
- Quantum efficiency at 850 nm: 33 %
- Temporal dark noise: 28.2 e⁻
- Saturation capacity: 8300 e⁻
- Dynamic range: 49.2 dB
- Absolute sensitivity threshold: 28.8 e⁻

Output

- Bit depth: 10 Bit
- Monochrome pixel formats: Mono8, Mono10

General purpose inputs/outputs (GPIOs)

- TTL I/Os: 1 input, 2 outputs

**Features**

**Image optimization features:**

- Auto gain (manual gain control: 0 to 22 dB)
- Auto exposure (manual exposure control: 1 µs to 1 s, 1 µs increments)
- Binning (horizontal and vertical) (sum)
- Decimation X/Y
- Enhanced Defect Pixel Correction
• Fixed Pattern Noise Correction
• Gamma correction
• Three look-up tables
• Region of interest

Camera control features:

• EF lens control (order option -18)
• Event channel
• Image chunk data
• IEEE 1588 Precision Time Protocol
• RS232
• Storable user sets
• StreamBytesPerSecond (bandwidth control)
• Stream hold
• Sync out modes: Trigger ready, input, exposing, readout, imaging, strobe, GPO
• Temperature monitoring (main board and sensor board)
• Trigger over Ethernet Action Commands
Applications

Prosilica GT4096NIR is ideal for a wide range of applications including:

- Outdoor imaging
- Intelligent Traffic Systems
- Public security and surveillance
- Industrial inspection (for example food, bottles, recycling, labels)
- Microscopy
- Military and space applications
- Medical and healthcare
- Other machine vision applications
