Description

2 Megapixel HD CCD camera, 63 fps, Dual interface Gigabit Ethernet output

Prosilica GX1910 is a high-resolution CCD camera with dual Gigabit Ethernet ports (GigE Vision®). This camera incorporates the ON Semiconductor KAI-02150 CCD sensor providing excellent image quality in High Definition resolution (1080p). At full resolution, this camera has a frame rate of 63 frames per second. With a smaller region of interest higher frame rates are possible. This camera has two screw-captivated Gigabit Ethernet ports configured as a Link Aggregation Group (LAG) to provide a sustained maximum data rate of 240 MBps. It can also work at half the bandwidth (120 MBps) using a single cable. By default monochrome models ship with no optical filter and color models ship with an IRC30 IR cut filter.
