Description

6.1 Megapixel CCD camera with high frame rate - Dual interface Gigabit Ethernet output

Prosilica GX2750 is a high-resolution CCD camera with two Gigabit Ethernet interfaces (GigE Vision®). This camera incorporates the Sony ICX694 CCD sensor that provides high sensitivity, near IR response, low noise, anti-blooming, and excellent image quality. Prosilica GX2750 is offered in both monochrome (GX2750) and Bayer color (GX2750C) models. This camera has two screw-captivated Gigabit Ethernet interfaces configured as a Link Aggregation Group (LAG) to provide a sustained maximum data rate of 240 MB per second. It can also work at half the bandwidth (120 MB/s) using a single cable. By default monochrome models ship with no optical filter and color models ship with an IRC30 IR cut filter.

Options:

- Nikon F-Mount (Factory conversion)
- Canon EF-Mount (Factory conversion via RS232 I/O)
- Optical filters (IR cut filter/Protection glass)

See the Modular Concept for lens mount and optical filter options.
