Certificate ISO 13485

Dear Mr. Dr. Häusler,

unfortunately, I have to inform you that we currently cannot issue ISO 13485 certificates. The reason for this is a temporary organizational problem at the German Accreditation Body, which handles the accreditation process with the involvement of assessors from the Central Office of the Federal States for Health Protection of Medicines and Medical Devices. Our responsible customer service representative at the DAkkS is pleased to receive this information by calling +49 6961094360. We would like to emphasize that TÜV Hessen has no open points in this process.

At the same time we confirm that the certification audit according to ISO 13485: 2012 of 2017-11-20 until 2017-11-30 does not contain any open points on your side.

We will issue the required certificate immediately upon receipt of our new accreditation certificate.

We apologize for this awkward situation and can understand your anger about it.
I hope for your understanding and assure you my continuing support.

Best regards

Dipl.-Ing. Ottmar Walter
Manager Certification Authority
