Mako U - Ultra-compact USB3 Vision cameras

Mako U-130 with ON Semi PYTHON 1300 runs 168.0 frames per second at 1.3 MP resolution.

The Mako U is an attractively priced camera in a compact rugged industrial housing. It's equipped with an USB3 Vision-compliant interface technology to enable a reliable connection to your host system and image processing solution. Basic functionalities, including screw mount connectors and multiple I/Os, facilitate straightforward system integration. Mako cameras are equipped with high-quality CMOS sensors to support the realization of future-oriented applications.

Mako U monochrome USB3 Vision cameras have the same compact housing with a form factor of 49.5 x 29 x 29 mm. Screw locks ensure a safe electrical connection even in harsh industrial environments.

Every model is powered over the USB interface and has opto-isolated I/Os. The GPIOs give Mako U maximum flexibility to adapt to specific needs. The two non-isolated GPIO lines are TTL-based and programmable as input or output.
