

Guppy F-044

- IEEE 1394a camera
- Lightweight
- Robust design
- Machine vision camera

Description

Ultra-compact, inexpensive 0.4 Megapixel camera - interlaced, high sensitivity

The Guppy F-044B/F-044C is equipped with an ultra-sensitive interlaced CCD sensor - which makes the move from analog to digital cameras (e.g. quality control applications) very easy. Additionally, with the Guppy F-044B NIR, a version with enhanced NIR sensitivity is available. At full resolution, it runs at up to 25 frames per second. Higher frame rates can be reached by a smaller area of interest (AOI).

Applications

Due to the very sensitive interlaced sensor, the Guppy F-044B/F-044C is a very inexpensive, easy solution for the switch from analog to digital cameras, e.g for quality control. The Guppy F-044B NIR version has enhanced near infrared sensitivity.
